Now, in this accessible and immersive debut cookbook, all of the incredible dishes that have made Bestia one of the most talked-about restaurants in the country are on full display. Rooted in the flavors and techniques of Italian regional cooking, these recipes include inventive hits like fennel-crusted pork chops; meatballs with ricotta, tomato,

greens, and preserved lemon; and agnolotti made with cacao pasta dough. Irresistible desserts such as apple cider donuts and a chocolate budino tart, from co-owner and pastry chef Genevieve Gergis, end the concert of flavors on a high note. With chapters on making bread, pasta, and charcuterie; sections on stocks and sauces; and new ideas for getting the most from your cooking by layering flavors, Bestia delivers a distinctively innovative approach to

The acclaimed chef

behind the Michelin-starred Mister Jiu's restaurant shares the past, present, and future of Chinese cooking in America through 90 mouthwatering recipes. "Brandon Jew's affection for San Francisco's Chinatown and his own Chinese heritage is palpable in this cookbook, which is both a recipe collection and a portrait of a district rich in history."—Fuchsia Dunlop, James Beard Award-winning author of *The Food of Sichuan* Brandon Jew trained in the kitchens

of California cuisine pioneers and Michelin-starred Italian institutions before finding his way back to Chinatown and the food of his childhood. Through deeply personal recipes and stories about the neighborhood that often inspires them, this groundbreaking cookbook is an intimate account of how Chinese food became American food and the making of a Chinese American chef. Jew takes inspiration from classic Chinatown recipes to create innovative spins like Sizzling Rice Soup,

Squid Ink Wontons, Orange Chicken Wings, Liberty Roast Duck, Mushroom Mu Shu, and Banana Black Sesame Pie. From the fundamentals of Chinese cooking to master class recipes, he interweaves recipes and techniques with stories about their origins in Chinatown and in his own family history. And he connects his classical training and American roots to Chinese traditions in chapters celebrating dim sum, dumplings, and banquet-style parties. With more than a hundred

photographs of finished dishes as well as moving and evocative atmospheric shots of Chinatown, this book is also an intimate portrait—a look down the alleyways, above the tourist shops, and into the kitchens—of the neighborhood that changed the flavor of America.

The previous conference in this series (AMTA 2002) took up the theme “From Research to Real Users”, and sought to explore why recent research on data-driven machine translation didn’t seem to be moving to the marketplace. As it turned out, the first commercial products of the data-driven research movement were just over the horizon, and in the intervening two years they have begun to appear in the marketplace. At the same time, rule-based machine translations

systems are introducing data-driven techniques into the mix in their products. Machine translation as a software application has a 50-year history. There are an increasing number of exciting deployments of MT, many of which will be exhibited and discussed at the conference. But the scale of commercial use has never approached the estimates of the latent demand. In light of this, we reversed the question from AMTA 2002, to look at the next step in the path to commercial success for MT. We took

user needs as our theme, and explored how or whether market requirements are feeding into research programs. The transition of research discoveries to practical use involves technical questions that are not as sexy as those that have driven the research community

and research funding. Important product issues such as system customizability, computing resource requirements, and usability and fitness for particular tasks need to engage the creative energies of all parts of our community, especially research, as we move

from a niche application to a more pervasive language conversion process. These topics were addressed at the conference through the papers contained in these proceedings, and even more specifically through several invited presentations and panels.
