Meteorologist Carly Cassidy visits climatology "normals"

Climatology Researchers hope that a network of highly consistent climate-observing sites will resolve long-standing issues with climatological data. A Global Monitoring System Could Change the Future of Climatology Lack of a current, national rainfall database means some states are using outdated data - some as much as 60 years old - as they design new roads, bridges and dams. That's a dangerous problem as the ...As rainstorms grow more severe and frequent, communities fail to prepare for risks ice-out is a wonderful spring sign, and as ice is leaving, common loons, great blue herons and ducks and other waterfowl return or stop off on their migration routes. Ice-out is so common, yet still a fascinating transition Observations from one site, averaged over time, provide a climatology of the weather at that location. The same can be said for all observation locations. Extended abnormally dry period in Chicago to be relieved by periods of rainfall through Sunday Near the Twin Cities, Lake Minnetonka lost its ice March 30, a full two weeks earlier than the April 13 median date over 166 years of records kept by the Minnesota Climatology Office. Way up north, ...Minnesota lakes losing ice 2-3 weeks earlier than usual Phil Klotzbach, a researcher and hurricane expert at Colorado State University, issued his preliminary forecast for the 2021 Atlantic hurricane season Thursday. He's predicting another busy season. 2021 hurricane season predicted to be another busy one.
